ABOUT ME

I am a Frontend Developer with 2 years of experience in designing, developing, and optimizing web interfaces. I specialize in creating efficient and scalable solutions, applying modern technologies such as Astro, React, Tailwind, and TypeScript. Throughout my career, I have worked on system integration, code refactoring, and performance optimization, combining best development practices with a mindset focused on continuous improvement.

Responsive Web Design
2023

SKILLS

Languages:

HTML, CSS, JavaScript, TypeScript

Frameworks & Libraries:

Astro, React, Tailwind

Databases:

PostgreSQL, MySQL

Tools:

Git/GitHub, Render, Insomnia

LANGUAGES

- Spanish (NATIVE)
- English (C1)

PROFESSIONAL EXPERIENCE

Frontend Developer

AENIMA SRL - 2023 to 2025

I worked as a software developer, participating in the full development cycle of various projects, from conceptualization to implementation. Additionally, I was responsible for the maintenance of multiple websites, including those developed in WordPress. Among my notable tasks were the creation of comprehensive solutions using cutting-edge web technologies.

- Web development and maintenance
- Process optimization
- Team collaboration

Freelance Developer

2022 to Present

As a freelance developer, I focused on improving my technical skills by developing my own projects such as an e-commerce site with payment integration, my web portfolio, and the Rick & Morty App, where I strengthened my knowledge in API consumption, state management in React, and development best practices.

- Technical skill improvement
- Development of complex projects
